

*Newborns...*there is nothing more precious. It is an honor to be able to capture those sweet little fingers and toes within the first 2 weeks of life.

Scheduling your session... The best time to call to schedule your newborn session is before the baby is born. We will pre-book your session based on your due date. As soon as your bundle arrives, let us know and we will finalize your session time. We prefer to photograph our little subjects within 2 weeks of birth during the sleepy brand new stage when they curl up so sweetly. A \$100 deposit is required to book a newborn session.

Your consultation... We will discuss the details of your session such as: location, favorite props, and color schemes. Your plans for your portraits, such as birth announcements, gift portraits and placement of wall portraits can also be discussed at this time.

Your maternity session... If you are planning to document your pregnancy with a maternity session it is best to schedule your session for your 7th or 8th month if possible.

Your newborn session... We offer the convenience of staying in the comfort of your home with your new baby. Newborns are so tiny, we can photograph them in almost any space. We will bring our lighting and props, so the only thing you need to supply is the subject! Your newborn session may last up to 2-3 hours to allow for feeding, changing and soothing. Plan to have your baby fed just before the session, then relax and enjoy as we gently pose our subject to create portraits you will cherish forever. Your package payment is due at the time of your session.

*Viewing and ordering...*Your images will be uploaded to a private gallery for you and your family to preview and make your choices. The images you choose will be fully edited and uploaded for you to download and enjoy!
